Representation In Mind Volume 1

The notion of a "mental representation" is, arguably, in the first instance a theoretical construct of cognitive science. As such, it is a basic concept of the Computational Theory of Mind, according to which cognitive states and processes are constituted by the occurrence, transformation and storage (in the mind/brain) of information-bearing structures (representations) of one kind or ...

3. Kant's View of the Mind 3.1 Method. Turning now to Kant's view of the mind, we will start with a point about method: Kant held surprisingly strong and not entirely consistent views on the empirical study of the mind. The empirical method for doing psychology that Kant discussed was introspection. Sometimes he held such study to be hopeless.

In 3D computer graphics, a voxel represents a value on a regular grid in three-dimensional space. As with pixels in a 2D bitmap, voxels themselves do not typically have their position (i.e. coordinates) explicitly encoded with their values. Instead, rendering systems infer the position of a voxel based upon its position relative to other voxels (i.e., its position in the data structure that ...
