Rover 75 V/99 Auto Gearbox - Aprilia What you are talking about is 'flaring' - often caused by low line pressure. I am not completely familiar with the autobox on your car, but many Jatco 'boxes have a line-pressure modulator solenoid (duty cycle control) to vary the line pressure during gearchanges.

Rover 75 V/99 Auto Gearbox | Technical matters | Back Room ...

This is most likely due to the governor sticking. The governor is a device that senses the output shaft speed and provides signals to the hydraulic control valve telling the transmission when to shift. If you change the transmission filter and transmission fluid, this should remedy the problem.

The clutch release bearing is lubricated by a splash-fed channel from the gearbox. If left for a long period standing, the oil can drain back from this channel. This is the root of the common problem selecting gear (particularly reverse) when the gearbox is cold. Don't worry, the oil will soon replenish itself in the channel.
